Source: Regional reports and databases

Notes:

- * indicates 1996 data
- Values are at first sale excluding landings made by third country vessels into the regions
- Not all regions could provide data on the source of landings. In some regions data include EU landings by national vessels outside of the region, in others it may include landings of fish by vessels of other MS. There may be therefore double counting of some landings.
- The regional and EU totals include a wide range of products, including part processed products (eg. fish frozen at sea) and bivalve mollusca.
